

E.g. Accounting, Drupal, Denver, Transit

Search All

Find out what's working, where.

The Civic Commons Marketplace connects cities around the apps they buy and build.

FEATURED DEPLOYMENT

Open Source IT Management

The Office of Management and Budget developed used The IT Dashboard to save over 3 Billion dollars by better tracking their IT spending. Developed and deployed using Drupal, an open source Content Management System and including information on Federal IT investments, the tool is useful to the public and to government IT leaders who plan and manage IT investments.

ADD TO THE MARKETPLACE

This is a community-driven site. Here's how you can help make it better:

Work in city IT?

List the apps you currently use

Share the apps you're building

Tell us what you need final text tbd but will link to ways to participate

Build or support civic software?

List your tools and where they're in use

Have a question?

Join the community and ask

24 Apps

14 Installs

132 Contribs

14 Apps

Not clear if this should go to contributions, or just all deployments that are listed for that place. In general, we need to figure out how to distinguish bwn the two

[-> /apps/<app>/deployments](#)

[-> /community/<user>#contribs](#) (currently undefined)

[-> community/<vendor>/apps](#)
OR [community/<vendor>#apps](#)
Should this go do an apps list or a deployments list?

MOST ACTIVE CITIES

[More ->](#)

This is showing something different than "browse apps by places" -- it's place-centric rather than app-centric

Cities with the most "stuff" are listed. A small popup will show details for that place, eg: "SF: 43 apps, 12 contributions, 11 community members."
