Drupal

Drupal is a free and open source content management system (CMS). It is used as a back-end system for at least 1.5% of all websites worldwide ranging from personal blogs to corporate, political, and government sites including whitehouse.gov and data.gov.uk. [Read more »](#)

Watch this app saves it to a users dashbosrd, save allows them to share it via social media (twitter, linkedIn, possibly govloop)

when user clicks "rate this", they are directed to the deployment widget's rating entry (bottom of this page widget 1) via a jump link.

when user clicks "i use this", they are directed to the deployment widget's entry (bottom of this page widget 1) via a jump link.

when user clicks "we provide support", they are directed to the deployment widget's entry (bottom of this page widget #1) via a jump link.

links to the agency.

removed the "I spotted it", button, as the widget box next to it is where we were directing them.

Photos and videos show in a modal lightbox.

see deployment story edit / view page.

shows next question on click. See deployment widget flow and deployment questions doc.
